Read the passage given below carefully and answer the question that follows :

Emma had always been fascinated by the ocean. As a marine biologist, she spent her days studying coral reefs and their delicate ecosystems. Her latest research took her to the Great Barrier Reef, where she and her team were investigating the effects of climate change on marine life.

One morning, as Emma dived into the crystal-clear water, she noticed something alarming - several sections of coral had turned completely white. Coral bleaching was spreading faster than expected. Taking out her waterproof tablet, she recorded the water temperature and pH levels, confirming her fears: the rising sea temperatures were endangering the reef.

Determined to find solutions, Emma worked tirelessly in the lab, analyzing her data and collaborating with other scientists. They discovered that some coral species were more resistant to heat and began experimenting with ways to help weaker corals adapt. Their efforts offered a glimmer of hope, but Emma knew that real change required global action.

As she looked out at the vast ocean, she felt a mix of urgency and hope. The reef's future depended not only on scientific intervention but also on people making sustainable choices. She promised herself that she would continue fighting for the ocean, no matter how difficult the challenge.

Emma's research in collaboration with other scientists led her to discover that :

- (1) Some coral species were resistant to heat.
- (2) The barrier reef was recovering naturally.
- (3) Pollution was the only cause of coral bleaching.
- (4) Coral reefs were unaffected by climate change.

(A) 1

(B) 2

(C) 3

(D) 4

Read the passage given below carefully and answer the question that follows :

Emma had always been fascinated by the ocean. As a marine biologist, she spent her days studying coral reefs and their delicate ecosystems. Her latest research took her to the Great Barrier Reef, where she and her team were investigating the effects of climate change on marine life.

One morning, as Emma dived into the crystal-clear water, she noticed something alarming - several sections of coral had turned completely white. Coral bleaching was spreading faster than expected. Taking out her waterproof tablet, she recorded the water temperature and pH levels, confirming her fears: the rising sea temperatures were endangering the reef.

Determined to find solutions, Emma worked tirelessly in the lab, analyzing her data and collaborating with other scientists. They discovered that some coral species were more resistant to heat and began experimenting with ways to help weaker corals adapt. Their efforts offered a glimmer of hope, but Emma knew that real change required global action.

As she looked out at the vast ocean, she felt a mix of urgency and hope. The reef's future depended not only on scientific intervention but also on people making sustainable choices. She promised herself that she would continue fighting for the ocean, no matter how difficult the challenge.

What is Emma's profession ?

- (1) Oceanographer
- (2) Environmental journalist
- (3) Marine biologist
- (4) Deep sea diver

(A) 1

(B) 2

(C) 3

(D) 4

Q.Type : Objective Question
